## Fund objective

The Platypus Australian Equities Fund aims to outperform the S&P/ASX 300 Accumulation Index (before fees and expenses) over a rolling three-year rolling period.

## Investment philosophy

Our focus is to generate superior risk adjusted returns for investors. We believe that the risk-return offered by the Australian

equity market can be improved by utilising skilfully applied active management.

Our fundamental belief is that companies should exhibit a track record of earnings and preferably dividend growth to be considered an investment proposition. We believe that share price performance over the medium to long-term is driven by consistent earnings growth; hence this is our primary focus.

We approach portfolio construction with an index agnostic attitude. We are far from index huggers.
